IAP20 Rec'd PCT/PTO 31 JAN 2006

THE FOLLOWING IS THE ENGLISH TRANSLATION OF THE
AMENDMENTS TO THE CLAIMS OF THE INTERNATIONAL
APPLICATION UNDER PCT ARTICLE 19:

AMENDED SHEETS (Pages 123 and 124).

CLAIMS

1. An information processing device storing user information related to a user and communicating with a plurality of other information processing devices, said information processing device comprising:

presenting means for presenting user information to be read or changed by said other information processing device;

specifying means for specifying permission to read or change the user information presented by said presenting means;

identifying means for identifying said other information processing device; and

storing means for storing the user information read or changed by said other information processing device identified by said identifying means in association with said other information processing device.

2. The information processing device as claimed in claim 1, further comprising communicating means for performing quasi-electrostatic field communication, electromagnetic wave communication, optical communication, or electric communication.

3. The information processing device as claimed in claim 1, wherein

a device external to said information processing device is used as an input or output interface.

4. The information processing device as claimed in claim 1, wherein

when an initial communication with said other information processing device is performed, information for identifying said information processing device is transmitted to said other information processing device.

5. (As amended) The information processing device as claimed in claim 2, wherein

when an initial communication with said other information processing device is performed, a first code used by said information processing device to encrypt information and a second code generated in correspondence with said first code are generated, and said first code is transmitted to said other information processing device, and

a third code used by said other information processing device to encrypt information is obtained via said communicating means.

6. The information processing device as claimed in claim 1, wherein

said user information is updated on a basis of a history of use of contents provided from said other
